"I was hesitant to put anything in my vehicle, but I'm glad I did. Besides better mileage – my vehicle is running like it did when I first bought it."

"I thought my car was dead! It was making noise, had poor acceleration and constantly hesitating. After one bottle it came back to life and keeps getting better with each additional bottle."

Diesel Anti-gel Fuel Treatment

Best for Cold Weather Environments

- Prevents formation of wax crystals & ice formation, preventing filter plugging
- Keeps injectors clean & disperses water
- Lubricant for low sulfur fuel

CDFA | 12 pack | 8 fl oz / 237 mL

Why Diesel Fuel Needs to be Treated During Winter Months

PROBLEM

Cold weather in diesel fuel causes wax formation, ice crystals, & poor stability, resulting in a loss of mileage efficiency, power and increased downtime.

PREVENTION

Prevent these winter problems by adding Cyclo's Diesel Fuel Treatment with Anti-Gel (C24 & CDFA) to your diesel. Our formula is designed to help prevent the major problems and downtime caused by cold weather diesel fuel wax, ice crystals and poor stability. This unique formula, which contains no alcohol attacks and helps reverse the effect of paraffin wax, water and carbon – the three major problems associated with diesel fuel.

PROCESS

Anti-Gel: Provides up to 50°F lower operating temperature than untreated fuel (depending on the fuel and treatment level – see chart) to help prevent fuel line and fuel filter plugging.

Water Remover & De-Icer: Inhibits ice crystal formation to prevent blocked fuel filters and fuel lines. This formula permits water to be blended into the fuel in a very fine dispersion to safely burn the water in the combustion chamber.

Fuel Stabilizer: helps maintain fuel stability to reduce carbon and varnish buildup and helps keep fuel injectors clean. Cyclo is formulated to assure good storage stability and protect against deterioration at elevated engine temperatures.

PROFESSIONAL PERFORMANCE TRUSTED THROUGHOUT THE WORLD

📍 = Cyclo Home Offices 🏢 = Cyclo Warehouses 📍 = Cyclo Distributors

For over 50 years, the Cyclo brand of professional quality products has been used in automotive, heavy duty/fleet, industrial, agricultural and marine services. The brand started as a line of service chemicals which was largely sold through traditional warehouse distributors to jobbers and then to professional mechanics and serious do-it yourselfers. The line is known for its professional quality formulas and superior packaging since the first Cyclo product was introduced - Carb Clean® Fast Gum Cutter.

The array of colors used in Cyclo packaging was originally introduced for the professional, so he could quickly reach for a product without having to read the label. Cyclo products have always been formulated for professionals who use the products as tools to do their jobs quicker, easier and better. One comment heard over and over from mechanics trying products for the first time is that they are amazed at how much quality and effectiveness they can get out of one can.

In 2000, Cyclo acquired the Rally® and No 7® car care brands from the Clorox® Company. The acquisition of these two world-famous appearance brands broadened Cyclo's offering and stature in the aftermarket. Both lines fit perfectly with Cyclo's professional quality products in both performance and quality. In 2003, the additional acquisition of Tanner's Preserve® Leather Care products from Clorox added another category to Cyclo.

Cyclo developed an export business more than 25 years ago and currently has distributor relationships in over 80 countries around the world. In 2006, Cyclo was acquired by Pidilite USA Inc., a division of Pidilite Industries, Ltd. headquartered in Mumbai, India. Pidilite employs over 3,000 people in 14 countries with customers throughout the world.

Cyclo products are proudly Made in the USA. The company manufactures an american-made product line to ensure their impeccable standards are met. Cyclo is continually researching new formulas and products to bring to dedicated customers who have long depended on Cyclo for the latest developments in strong and effective formulas. Whether it is new VOC compliant formulas or new premium products offering the best and newest innovations, Cyclo is the company that has not only been working for the professional in the past, but will continue to do so in the future.
